

EMERALD EXPRESS INTERNATIONAL ANNOUNCES SUPERIOR NON-DENATURED, BIOLOGICALLY-ACTIVE ACTION WHEY PROTEIN

Emerald Express International, a visionary company dedicated to bringing the highest-quality consumable nutritional products to the online shopping community, recently made major strides in the health product industry – plus was chosen to be featured on the award-winning television series, “Insights” with Hugh Downs – with the introduction of its incredible new signature product, Action Whey protein.

A perfect 100%-natural whey protein food, Action Whey is derived from fresh raw milk from grass-fed cows, and fulfills all the promises made by inferior commercial whey protein shakes including easier weight management; indulgent, guilt-free, delicious taste; muscle nourishment, strength and performance; powerful immune-supporting nutrients; superior anti-aging benefits, plus so much more!

According to Adrian Goad, President of Emerald Express and a longtime health and nutrition research expert, “No other protein shake has been able to achieve a 65% protein blend with 100% natural and organic ingredients, cold-processed whey from grass-fed cows, an incredibly low price, and a taste just like a malt shop milkshake!”

Action Whey is also:

- Naturally Sweetened – No Sugar Added, No Artificial Sweeteners, No Fructose
- Low-Glycemic, Low-Carb and Diabetic Friendly
- Pesticide Free – No Hormones, Chemicals or GMO Ingredients
- Made Only with Whey from Grass-Fed Cows for Maximum Nutrition
- Non-Denatured – No Damaged Proteins; Cold Processed from Raw Milk
- Optimally Healthy with Co-Factors from Nutrient-Rich Coconut Oil
- 100% Natural with Nothing Artificial or Synthetic

“We use only the best ingredients for maximum flavor and extra health benefits: real vanilla beans and un-tempered, alkali-free organic chocolate. Action Whey can be served as a shake, rich pudding, fruit smoothie, milk substitute in cereal, or many other ways,” Goad explains.

Not only is Action Whey great tasting and good for your overall health; its benefits as a superior whey protein have been nationally noticed as vital fuel for the production of Glutathione, the body’s master antioxidant known to have a strong connection with disease and aging. This coming Spring, the award-winning educational series, “Insights” with Hugh Downs, will feature an upcoming segment on Glutathione and its positive health effects on national television, with Goad and other company-affiliated experts as contributors, including Mark Houston, Director of the Center for Anti-Aging and a Board Certified physician in anti-aging.
